

INSTALL VINYL GRAPHICS

1 CLEAN SURFACE

The surface should be cleaned using a low grade, ammonia free detergent. For the highest quality application, the surface should be non porous and not have a primed or flat surface.

2 MEASURE & MARK

Measure the application area to check for fit and position. Mark the desired application area using masking tape.

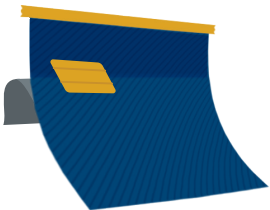

3 POSITION GRAPHIC

Position the graphic within the application area using the masking tape as a guide.

4 CREATE HINGE

Once the graphic is in the desired position, apply masking tape along the top of the graphic to create a hinge. This will keep the graphic positioned correctly during the application process. Remove the masking tape used for marking in step 2.

5 APPLY GRAPHIC

Lift the graphic on the masking tape hinge and carefully begin peeling the backing from the top. Peeling only a few inches at a time and working slowly from top to bottom, use a squeegee to press the graphic to the mounting surface, removing air bubbles as you go. Continue this process until the graphic is fully adhered.

6 FINISH

Carefully remove the masking tape from the top of the graphic.
